Organizing for Change: Addressing Classism in Your Faith Community

This interactive, full-day workshop will strengthen your UU congregation as you explore the implications of class and classism, begin the process of becoming less classist and more class inclusive, and organize more effectively across class lines.

- Better understand the strengths and challenges of class differences and of each class background.
- Relate our UU principles to the development of language, concepts, and strategies to understand class differences and issues.
- Consider the intersection between class and race and other issues of oppression, and the relationship between class stereotypes and escalating inequality.
- Increase our effectiveness in building strong class inclusive institutions and learn to avoid the miscommunication and distrust that can weaken our efforts to advance social justice.
